

# M230i Pallet Labeller

Exceeding expectations for reliability and performance

The **M230i** Pallet Labeller is a flexible and reliable automated pallet labelling solution to deliver unparalleled performance for many years to come.

Domino. Do more.

# Offering the last word in reliability and performance the **M230i** Pallet Labeller will give you a cost effective and flexible solution to your pallet labelling requirements.

The **M230i** Pallet Labeller series offers a wide range of standard features built into cabinets of either stainless steel or aluminium. It delivers a flexible, reliable, safe, and easy-to-operate solution to ensure maximum productivity for many years to come, even in the harshest of industrial environments. In short, it's a labelling solution made on your terms.

## Rugged industrial design

The **M230i** Pallet Labeller is compact in size, yet rugged and industrialised. Thanks to its innovative design the applicator can easily be set up to label one, two, or three sides of the pallet, giving you the flexibility to meet both current and future requirements.

## Simple integration

Ease of integration is key for our customers and the clean, modular design of the **M230i** Pallet Labeller ensures this, whether you are installing a brand new facility or integrating automated pallet labelling into an existing line. Our suite of powerful software packages helps facilitate this, and we offer full support during the design and implementation phases of the project.

## Dependable reliability

The **M230i**'s innovative design and robust construction ensures that labels are applied with perfect precision for years to come. An optional integrated check scanner ensures that pallets cannot move on until they have fully readable barcode labels applied.

## Safe operation

Cabinet mounted sensors prevent operator access to moving parts, ensuring safe yet convenient operation.

## Ease of use

Protected quick-release connectors for secure and easy installation. Simple label & ribbon paths, with clear colour threading diagrams. RS232 & Ethernet interfaces and multiple configurable I/O's make integration easy.

## Flexibility

Unique applicator head design allows easy configuration for every application. The innovative non-stick applicator pad easily handles standard label sizes, e.g. A5 and A6.

## Supply Chain Traceability

Pallet labelling is the foundation of supply chain traceability, creating a unique identity that is essential for shipments, warehousing, and storage of goods. The **M230i** Pallet Labeller offers the traceability customers have come to rely on.

## Built to last

All industries have unique requirements and the **M230i** Pallet Labeller is designed to withstand the challenges. For demanding industries, such as Food & Beverage, the stainless steel cabinet is the preferred choice for maximum protection and durability.

## GSI Compliant

The **M230i** Pallet Labeller allows you to meet the GSI standards by producing fully compliant Serial Shipping Container Code (SSCC) barcode labels. It can be configured to apply labels onto one, two or three sides of the pallet.

## Part pallet functionality

Built-in functionality enables the **M230i** Pallet Labeller to be automatically put into part pallet mode, which ensures safe and easy labelling of part pallets using Domino's popular **QuickDesign** software. Alternatively, an additional desktop printer can be specified and integrated into the system to meet this requirement, while also acting as a back-up printer to the main pallet labeller.

## Choice of cabinets

While the ruggedness of the **M230i** Pallet Labeller's stainless steel cabinet suits the stringent requirements in a variety of industries, for less demanding environments the aluminium cabinet is the most cost efficient solution. It offers the same standard features, such as right and left handed versions, along with spring loaded pad suspension.

The **M230i** Pallet Labeller offers a wide variety of options, including:

- Air conditioning
- Heater
- Touch screen user interface
- 3-sided labelling

The **M230i** Pallet Labeller series is designed to give you a labelling machine that will not only stand the test of time, but which also offers unmatched flexibility.

- Quick & easy integration
- Left & right handed versions
- Easy & intuitive communications interface
- Fast & easy service & maintenance
